Summary

As a passionate software engineering student at the University of Central Punjab, I thrive on learning and leveraging the latest technologies to create innovative solutions. Currently pursuing my Bachelor's degree, with an expected graduation in 2025, I am deeply immersed in the world of software development.

Since September 2023, I've been honing my skills as a React Developer, bringing ideas to life through various projects. My portfolio includes the development of two 2D web-based games and a sleek portfolio website, all powered by React.js, where I've extensively utilized React hooks, Tailwind CSS, and Zustand to deliver engaging user experiences.

In addition to my expertise in React, I've also delved into Flutter app development, leveraging my experience with Android Studio to craft intuitive mobile applications. Exploring new technologies is my passion, and I've recently embarked on a journey as a full-stack developer with Next.js, integrating MongoDB into my projects for robust backend support.

I'm driven by the excitement of turning concepts into tangible software solutions and am always eager to take on new challenges.

Experience

Laravel Developer

TriCloud Technologies

Aug 2024 - Present (1 month)

I began my internship at TriCloud, where I'm currently working as a backend developer with the Laravel framework. I'm thrilled about this opportunity and am gaining solid experience with MVC frameworks.

NextJS Developer

Self employed

May 2024 - Present (4 months)

I'm diving into Next.js. I love learning new tech, and I'm aiming to become a full-stack developer.

React Developer

Self employed

Aug 2023 - May 2024 (10 months)

I stay updated with the latest technologies and trends in web development. Recently, I've been actively working on React.js. I've completed multiple projects using React.js, including two 2D web-based games called 'Sword and Shield' and 'Zombie Slayer.' Facebook clone (integrated 2 APIs), Weather App and more. Additionally, I've created a portfolio website for myself.

React Developer

CodSoft

Oct 2023 - Nov 2023 (2 months)

During my time as a ReactJS intern at CodSoft, I learned a lot and had a great experience. I got to work on cool projects like a product catalog and a to-do list. It was awesome! Working there helped me improve my skills and work better in teams. Overall, it was a valuable opportunity that boosted my confidence and taught me a lot.

Mobile Application Developer

Ingendev

Jul 2022 - Feb 2023 (8 months)

During this time, I focused on learning mobile app development using Android Studio and Flutter. I began with an internship in July 2022 where I learned about Android Studio, then smoothly transitioned to Flutter. This journey helped me understand how mobile apps work, from managing data with APIs to creating both backend and frontend components. I improved my programming skills and learned to make engaging apps with animations.

I've worked on various projects including a 2D game, clones of YouTube and Instagram, a Todo-list app, a food ordering app, and a weather forecast app. These projects gave me practical experience and boosted my confidence in mobile app development.

Education

University Of Central Punjab

Bachelor's degree, Computer Software Engineering

2021 - 2025

Licenses & Certifications

Certified ReactJS Developer - CodSoft

Skills

PHP • Laravel • Model-View-Controller (MVC) • Full-Stack Development • MongoDB • Next.js • Reactjs • Tailwind • Web Development • Android Studio
